## METHODOLOGY

The U.S. Department of Housing and Urban Development (HUD) requires that all Continuum of Care (CoC) jurisdictions across the nation complete a biennial unsheltered count and an annual sheltered count of all persons experiencing homelessness in the community on a single point in time during the last ten days of January. The Orange County CoC is among several CoC in California that were approved by HUD to reschedule the 2022 Point In Time to the last 10 days of February due to the impacts of COVID-19 pandemic and in an effort to safeguard the health of volunteers and vulnerable persons experiencing homelessness.

The County of Orange and Orange County CoC conducted the sheltered count the night of Monday, February 21, 2022. Emergency Shelters and Transitional Housing Programs collected participant-level demographic information from individuals and families staying the night in each program. The 2022 Unsheltered Count process took place over three days - Tuesday, February 22 through Thursday, February 24 - to ensure the 800 square mile Orange County jurisdiction was canvassed effectively. This methodology allowed the count teams to collect unique ID data points that were used to deduplicate records for the three-day street count process. The survey data was collected with ArcGIS Survey 123, a phone application that captures GIS locations and provides vital information that guides the way the County responds to homelessness in Orange County. The methodology for the 2022 Everyone Counts process provides the most accurate data on the scope of homelessness in Orange County, ensuring that Everyone Counts.
