

COUNTY OF ORANGE

OUR COMMUNITY. OUR COMMITMENT.

Community Project Funding Request

Emergency Operations Center

Orange County's Emergency Operations Center (EOC) serves a critical role in every phase of emergency management, from being the hub for all coordination during an incident to facilitating and directing recovery/clean-up. The County's current EOC, built in 1988, is outdated and fails to meet the County's complex coordination and technological needs.

The proposed project will support the design and construction of a new EOC at a more central location, near the existing Orange County Sheriff-Coroner's Technology Center in Tustin. The new EOC will enable multiple public safety agencies across Orange County and other regions to work together more efficiently, enhancing Orange County's disaster preparedness and prompt emergency response.

Project Status: SHOVEL-READY

If awarded, CPF funds will support design and engineering, construction, equipment (including information technology and audio-visual equipment), and furniture costs.

Personnel costs incurred directly by the County.

Rendering of 17,250 sq. ft. new second-floor EOC space.

PROJECT OVERVIEW

Lead Agency & Program

Federal Emergency Management Agency, Emergency Operation Centers

Budget

\$69.9 M
Total Cost

\$30 M
CPF Request

Key Benefits

- Enhances emergency response and recovery capabilities
- Improve response time and speed of activation
- Improve resource allocation and management
- Improve coordination and communication among multiple public safety agencies

Location

Tustin, CA
