Community Project Funding Request

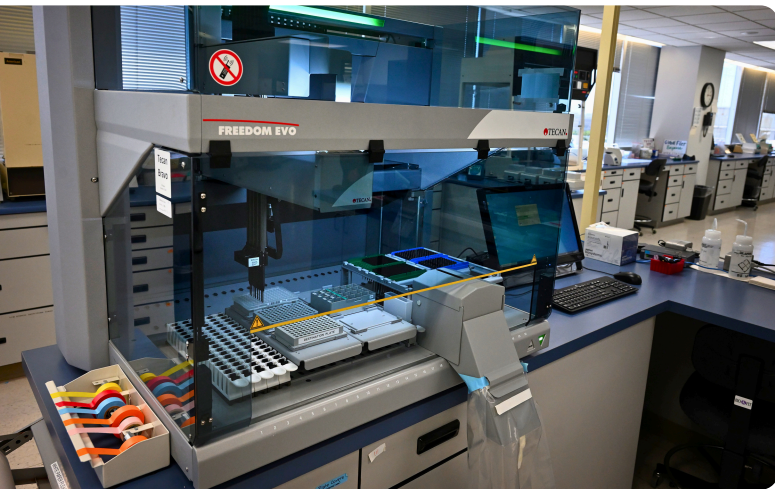

## Orange County Crime Lab Infrastructure Migration

The Orange County Crime Lab is a comprehensive forensic facility that provides mission-critical toxicology, DNA, ballistics, and narcotics analysis to law enforcement. The crime lab relies on last-generation infrastructure, which hampers the Orange County Sheriff-Coroner's ability to use new technology. Improvements in digital infrastructure for crime forensics will lead to faster emergency response times and greater operational efficiency.

### Project Status: SHOVEL-READY

If awarded, CPF funds will be used to support contracted migration services, network infrastructure, and security-related hardware and software, licensing and subscription fees, and internal training.

*Project milestones span FY 25-26 through FY 27-28.*

*A multi-functional robotic platform at the OC Crime Lab in Santa Ana.*

### PROJECT OVERVIEW

#### Lead Agency & Program

Department of Justice, Byrne Justice Assistance Program

#### Budget

**\$6.5 M**  
Total Cost

**\$2 M**  
CPF Request

#### Key Benefits

- Improved continuity of operations for critical public safety services
- Improved network security standards and centralized monitoring practices
- Reduced exposure to vulnerabilities
- Improved scalability and flexibility
- Reduced unplanned downtime
- Reduced manual workload

#### Location

Santa Ana, CA
